SIC CODE (Standard Industrial Classification Code)

The objective in industry classification is to have each place of business coded on the basis of its principle activity. If a firm conducts different activities at its various establishments, separate industry codes are assigned to the extent possible to each activity. Industry codes are assigned to each reportable establishment based on 'nature-of-business' information employers submit, in accordance with the Standard Industrial Classification Manual, 1972 edition.

ESTABLISHMENT

An establishment is defined as a single physical location at which one, or predominantly one, type of economic activity is carried on. Employers who operate at two or more locations are requested to identify separately the employment and payrolls of each location.

EMPLOYMENT

Employment of a given month is the number of workers covered under the Montana Unemployment Insurance laws who earned wages from a reporting unit during the pay period which includes the 12th day of the month.

GROSS WAGES

Total wages, as reported on the quarterly contribution report of employers covered by the Unemployment Insurance law, are the total amount of compensation paid by the employer during the quarter.

TAXABLE WAGES

Taxable wages are that part of employers' annual wages subject to the Unemployment Insurance tax. Taxable wages are reported quarterly, and normally are highest in the first and second quarter, since UI taxes apply to first dollars earned during the year.

CONTRIBUTIONS

Contributions are the taxes due on taxable wages for the quarter. Taxes are assessed on subject employers at rates determined by Montana's experience-rating law.

DISCLOSURE RESTRICTIONS

Publication of employment and wage data is withheld for any industry level which consists of fewer than three reporting units or in which a single establishment accounts for 80 percent or more of the industry's employment.

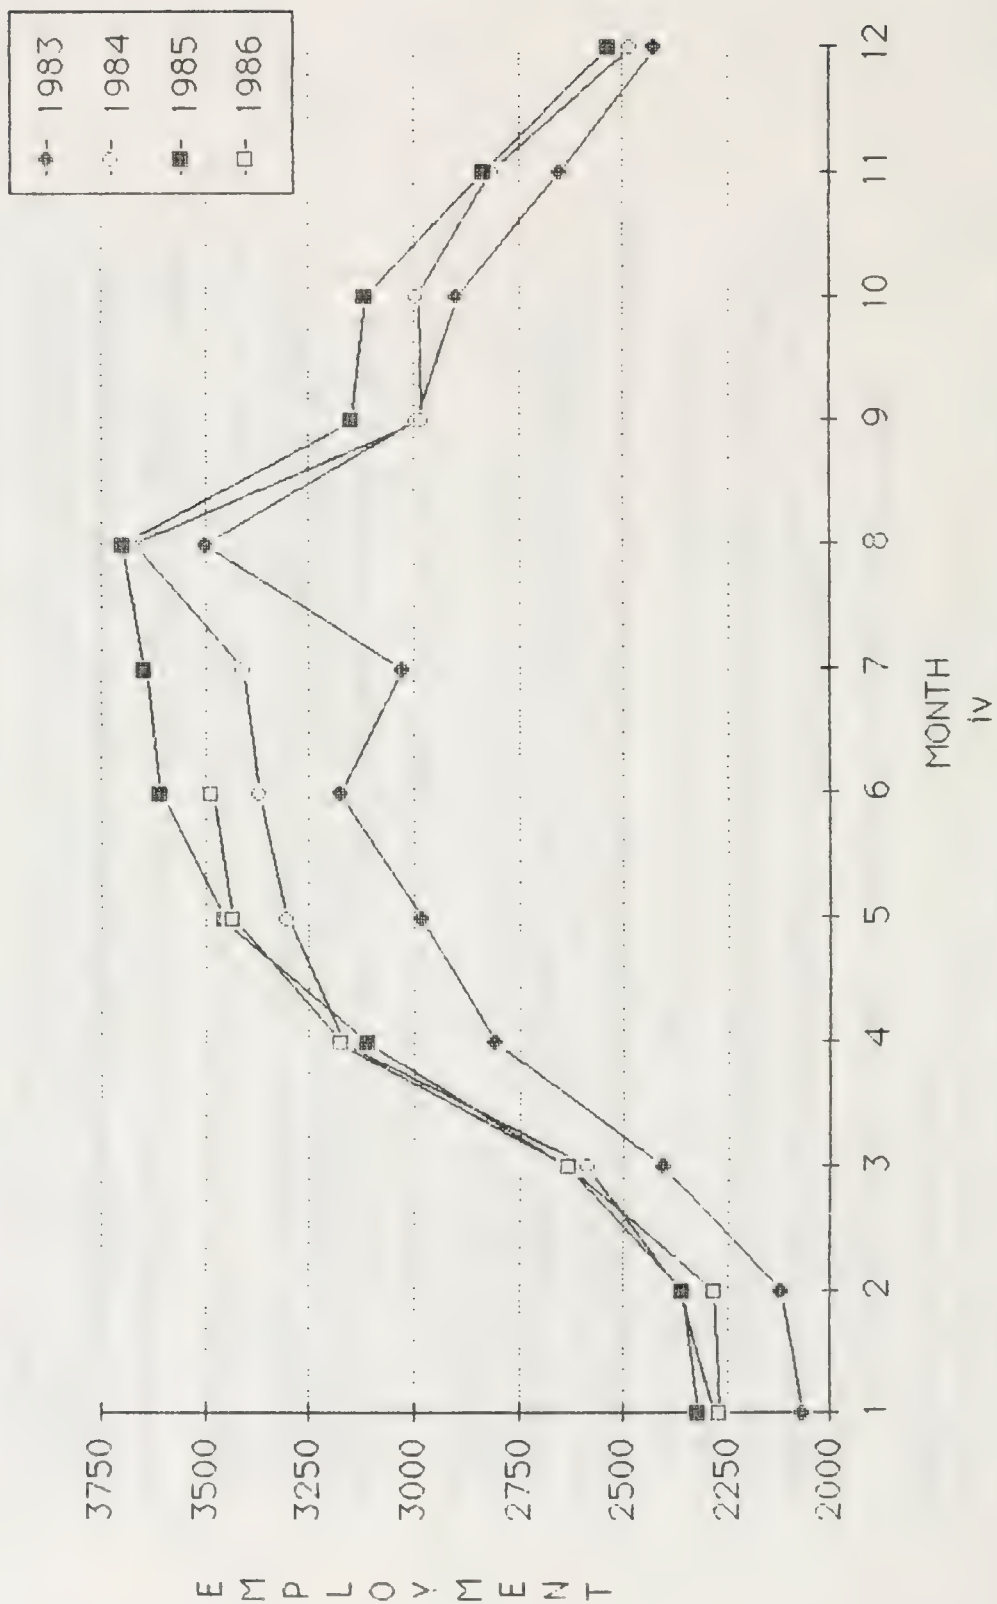

EMPLOYMENT COMPARISON 1983-86

Following are ten graphs by major industry group comparing employment for the years 1983, 1984, 1985, and 1986.

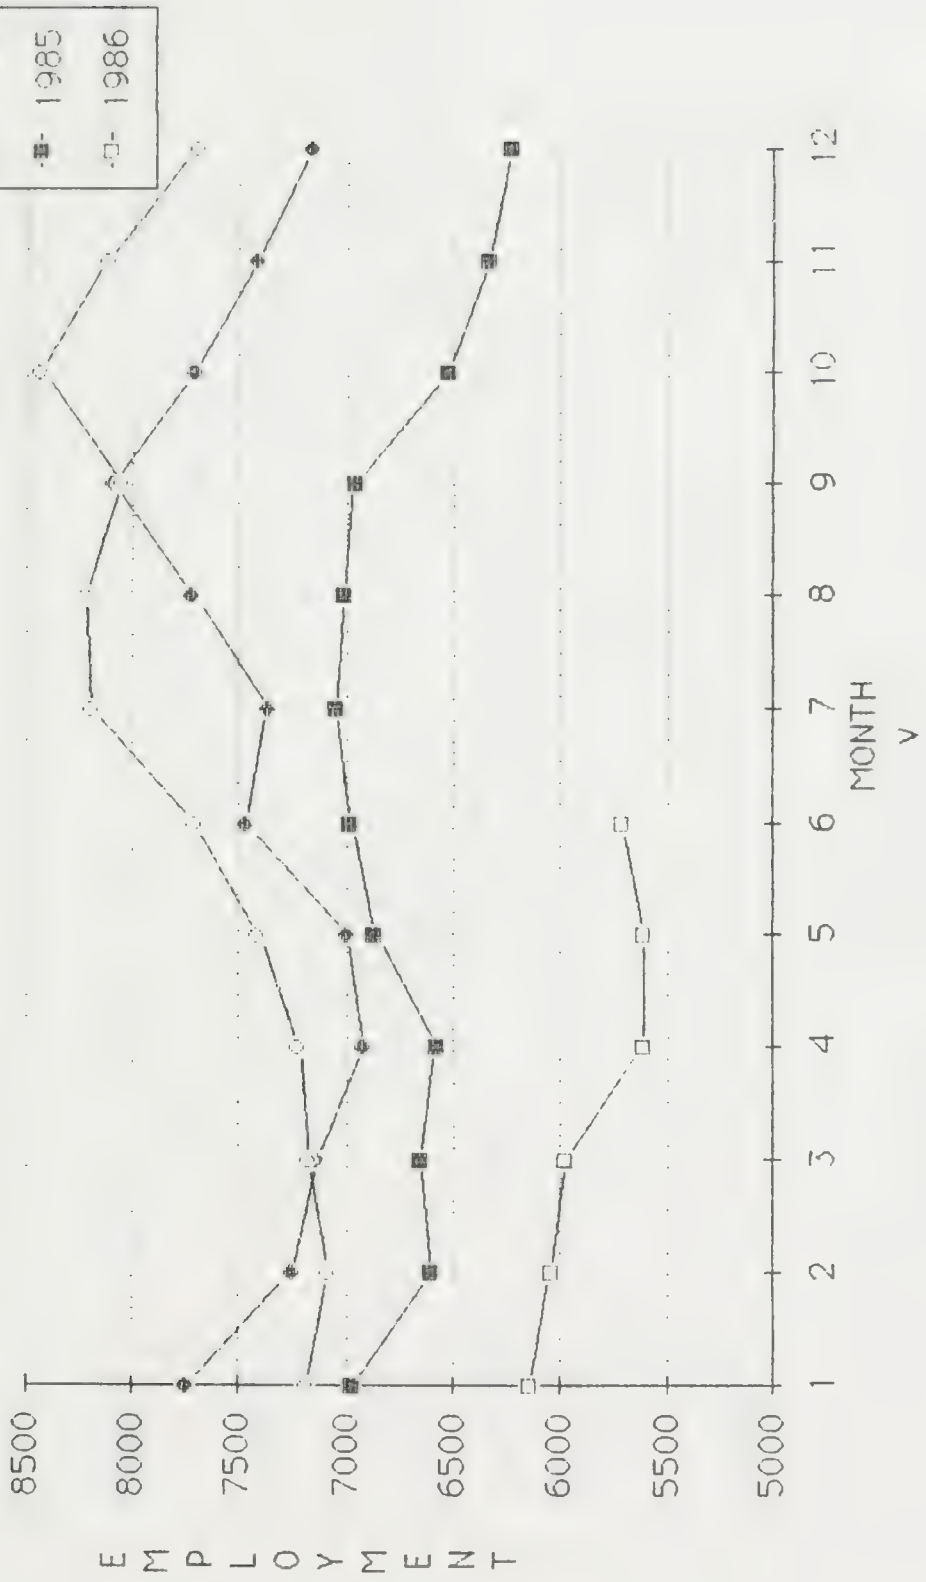

You will note that agriculture, forestry and fisheries; construction; manufacturing (due to logging); real estate; and services (due to the tourist trade) are all seasonal industries in Montana. Also, there is a large drop in government employment during the summer months when public schools are closed.

Compared to the three previous years, 1986 has shown lower employment levels in several industries. The most notable of these are mining, construction, manufacturing, and wholesale trade. Keep in mind that the large drop in mining is due to the decline in the oil and gas industry, and the large drop in wholesale trade is partially due to changes in industry classifications that take place the first quarter of each year. The industry groups that continues to show an increase in employment in 1986 is services. This can be attributed in part to Montana's emphasis on expanding its tourist industry.

WAGE COMPARISON 1983-86

Following are ten graphs by major industry group comparing wages for the years 1983, 1984, 1985, and 1986.

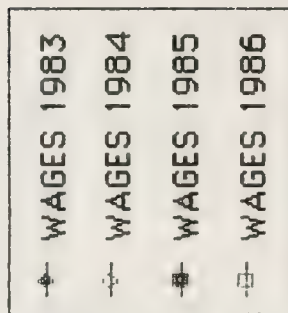

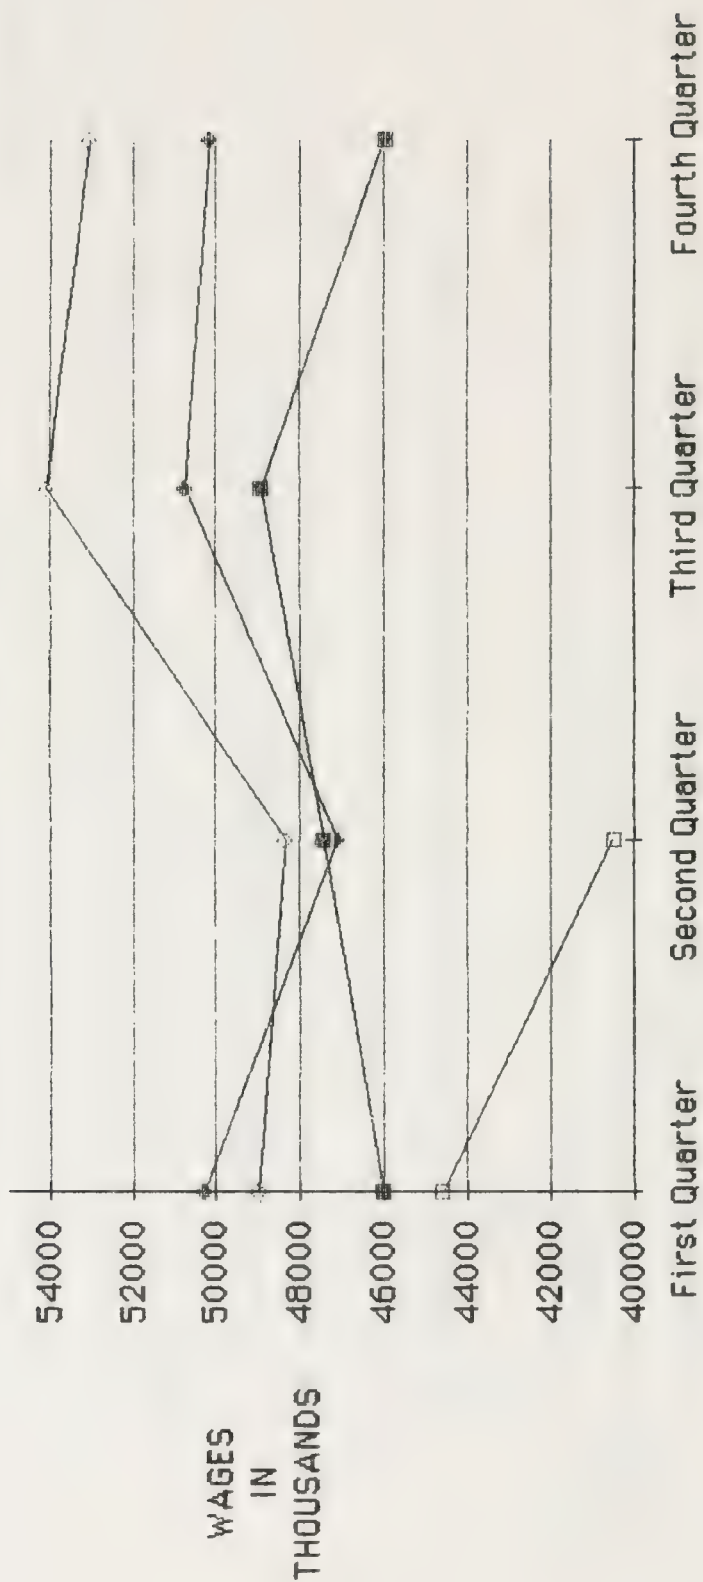

You will note that agriculture, forestry and fisheries; construction; manufacturing (due to logging); real estate; and services (due to the tourist trade) are all seasonal industries in Montana. Also, there is a large drop in government wages during the summer months when public schools are not in session.

Here again you will notice a large drop in wages in mining in 1986. This is due to the decline in the oil and gas industry. The drop in wages in wholesale trade in 1986 is due in part to changes in industrial classifications. Total wages for the construction, manufacturing, retail trade, and service industries increased during the second quarter of 1986 but not at as high a rate as they have in previous years.

Agriculture and Construction typically have lower employment and wages during first quarter of each year due to seasonality. Although Construction employment has dropped 11% from last year, second quarter reflects the increased activity in these industries as weather improves. The bulk of the drop in Mining employment and wages is due to the decline in the oil and gas industry. The decline in employment and wages from a year ago in Wholesale Trade is partially due to changes in industrial classifications that are made the first quarter of each year. Many of these businesses were reclassified into Retail Trade and Services.
